WHEELCHAIR LIFT FOR VEHICLES

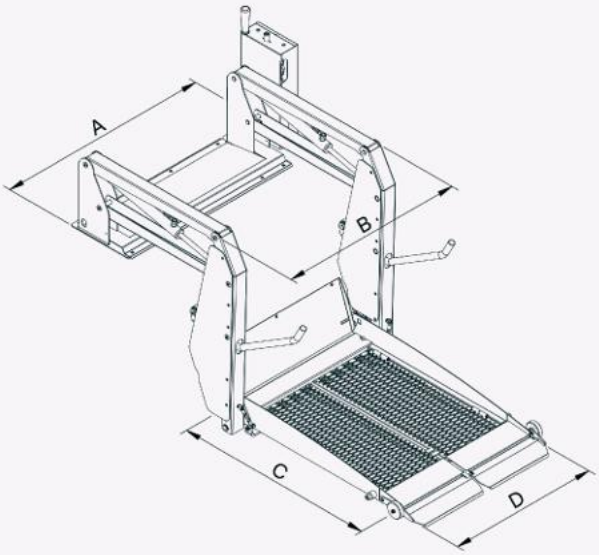

QUALITY **MADE IN ITALY**

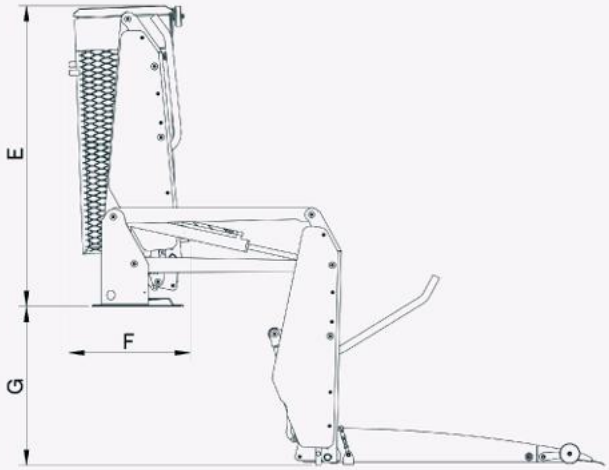

BBV | WHEELCHAIR LIFT FOR VEHICLES

The BBV models are fully automatic dual-arm lifts operated by a practical hand-held control pendant with coiled cable. The platform, featuring a non-slip grating surface with a vertical folding mechanism, is the distinguishing feature of this model. Its electro-hydraulic operation is simple, reliable and quiet. When installed at the rear tailgate of the vehicle, this type of lift ensures complete rearward visibility for the driver thanks to the vertical folding platform. All lifts in this range comply with current European Union regulations and meet the requirements for Electromagnetic Compatibility (EMC).
