LIFT TECHNICAL DATA SHEET

EP300

UNDERFLOOR LIFT

QUALITY **MADE IN ITALY**

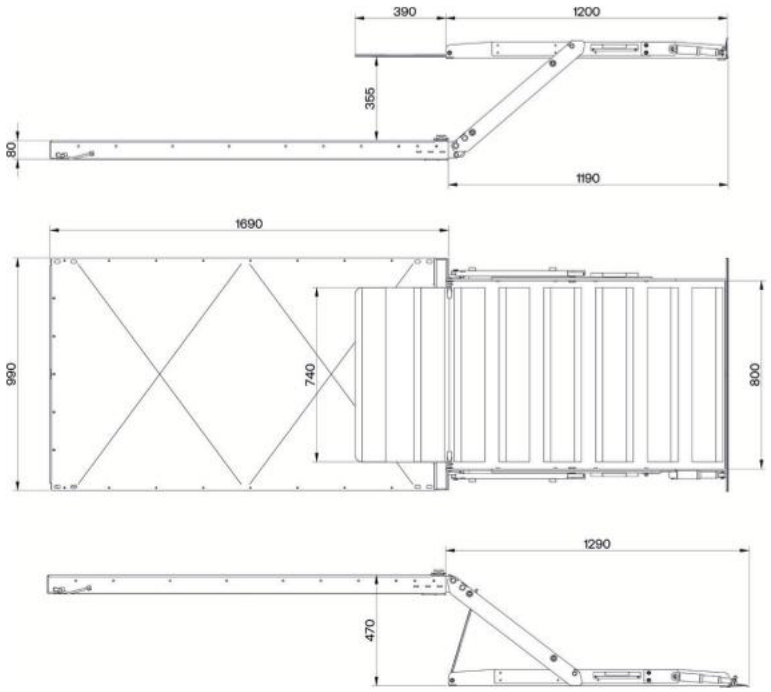

EP300 | UNDERFLOOR LIFT

The EP300 cassette lift, designed for installation underneath the vehicle, is particularly suitable for side access on a wide range of medium and large vehicles. The underfloor lift has been engineered with a reduced overall height, allowing side installation without modifying the vehicle's structural configuration; in fact, replacement of the fuel tank is not required. The EP300 is fully automatic and easy to operate, while its stainless steel construction ensures long-lasting durability. Like all lifts manufactured by MARIANI S.r.l., it is equipped with a manual emergency operating system that allows operation in the event of an electrical failure by means of the auxiliary emergency pump.
